

About the experts

Stefanie Wiens

Stefanie Wiens is the initiator of <Platz da!>. On the one hand, she conducts theoretical research on the topic of "inclusive museums" and on the other hand, she implements inclusion in practice. Passing on her art education scholarship to artists with "disabilities" was influential for her work. Together with the latter, she now advises (cultural) institutions as part of a steadily growing inclusive team.

Patricia Carl

Patricia Carl who is of small stature, works in the Ministry of Development and is the honorary head of the German Association of People of Small Stature and their Families (BKMF). She has been with <Platz da!> from its very beginning as she has always loved art and thinks that art houses and museums should be allowed to learn that being at eye level means a different thing to everyone.
